Dear Doctor:
Review of Optometry is pleased to offer you this preview of many exciting new products now available in the ophthalmic marketplace. In the pages to follow, you’ll learn about innovative new medications, diagnostic instruments, corrective lens options, in-office laboratory equipment and many other new products. To obtain more information on a particular product, follow these steps:

1. Circle the corresponding number on the enclosed reader service card for each product of interest to you.
2. Fill in your name and address.
3. Return the postage-paid card to us. Educational materials will be sent directly to you by the individual companies.

Thank you for your interest and support!
Ophthalmic Product Guide

**TOPCON KR-1 AUTO KERATO-REFRACTOMETER**
The new KR-1 Auto Kerato-Refractometer features fully automated operation with an easy-to-use color touch screen, a 360-degree rotatable monitor, and a flexible layout and space-saving design. The patented Prism measuring system ensures fast, accurate, and repeatable refraction and keratometry measurements.

**TOPCON KR-1W WAVERONT ANALYZER**
The 5in1 KR-1W Wavefront Analyzer from Topcon combines wavefront aberration, corneal topography, auto-refraction, keratometry, and pupillometry all in one unit! The system is extremely easy to operate, featuring auto alignment and measurement, a large color touch screen, and invisible light measurement for added patient comfort. The onboard evaluation software with multiple map displays provides valuable pre- and post-op data for cataract and refractive procedures. The system is fully networkable in various configurations.

**TOPCON SYNERGY™ ODM OPHTHALMIC DATA MANAGEMENT SYSTEM**
The Synergy™ ODM Ophthalmic Data Management System integrates images and reports from Topcon and over 150 other manufacturers’ systems into a single, secure, digital environment. With the ability to view, compare, annotate and transmit patient images seamlessly and securely, Synergy™ ODM provides for fluent workflow efficiency and helps the transition to a paperless environment. The web-based system allows for rapid access to patient information, anytime, from virtually anywhere, including workstations and remote computers. Designed as a scalable and flexible solution, Synergy™ ODM integrates with most EMR’s, is fully standards compliant and scalable to fit any size practice Sold separately or as part of a package.

**TOPCON KR-800S AUTO REFRACTOR WITH GLARE TESTING**
The new KR-800S Auto Kerato-Refractometer incorporates Topcon’s Rotary Prism technology for unparalleled accuracy and consistent measurements. It features several new tests, including visual acuity (VA) check for near and far distance, contrast sensitivity testing and glare testing, allowing you to confirm objective and subjective VA under glare conditions before cataract surgery. The compact and user-friendly design provides quick and accurate readings with minimal training required.

**TOPCON CV-5000S VISION TESTER**
The CV-5000S Automated Vision Tester sets new quality standards. The fast lens rotation provides comfort for both user and patient while the compact and contemporary design enhances the doctor’s professional image. The CV-5000S provides a complete 21-point refraction and features the KB-50S One Dial Controller with a 10.4” color touch-screen display. Complete connectivity allows data to be sent automatically to every CV system throughout the office and populated automatically into the EMR, making paperless refraction a reality.

**TOPCON 3D OCT-2000 SPECTRAL DOMAIN OCT**
The Topcon 3D OCT-2000 System is the first Spectral Domain OCT system to incorporate a high-resolution fundus camera and a user-friendly color touch screen display in a compact, space-saving design. The easy-to-use, intuitive FastMap™ software enables dynamic viewing of the OCT data, providing 3D, 2D and fundus images simultaneously. PinPoint™ Registration properly indicates the location of the OCT image within the fundus image. In addition, the compare function allows users to view serial exams in a comparison view and apply different analytical tools. The seamless integration of the 3D OCT-2000 with Topcon’s Synergy™ Ophthalmic Data Management System provides true connectivity and access to images anywhere, anytime.
AUTOMATIC LENS METER

- Complete automatic lens meter for the measurement and verification
- Sliding frame rest combined with a unique nose rest for easy measurement
- Instant measurement and reading of UV transmission,
- Tiltable color screen

STEREOTESTS & DISTANCE RANDOT STEREOTEST

Gold Standard Features Include:
- Polarized 3-D cleanable lenses
- Sturdy hard plastic viewer frames

Testing Formats Available:
- Stereo Fly
- Randot®
- Original Stereo Butterfly
- Random Dot E
- Randot® Preschool
- Distance Randot® Stereotest

TOPCON RETINAL CAMERA FAMILY AND IMAGENET 5

The Topcon imaging product line includes state-of-the-art instruments and image management software to suit a wide variety of practices. From our non-mydriatic and mydriatic retinal cameras to our image management systems, Topcon has the solution to fit your needs. All products provide outstanding image quality and diagnostic capabilities combined with efficient workflow and ease of use. Exclusives from Topcon include the Spaide Autofluorescence filters and the new DICOM-compliant IMAGEnet® 5 Digital Imaging System.
HIGH PERFORMANCE DIGITAL LENSMETER

The compact Huvitz HLM-7000 offers better ergonomics with the tilting screen function. Newly designed user interface and algorithm provide quick and accurate measurements.

- Automatic detection of progressive lenses and size
- Far or near sight addition is automatically calculated
- Dual PD and lens power measurement
- Extensive diopter range of +/-25D
- UV measurements to an exact value

BAUSCH + LOMB ULTRA™ CONTACT LENSES WITH MOISTURESEAL™ TECHNOLOGY

Recommended for patients who spend long hours using digital devices such as tablets, smartphones, or laptops; Patients experiencing end of day discomfort; Patients experiencing blurriness or visual fluctuation; Monthly and 2-week wearers looking for improvements in overall contact lens comfort or vision.

Upgrade your patients to Bausch + Lomb ULTRA™ and Break the Cycle of Discomfort for Unsurpassed Comfort & Vision all day.

COMPLETE INTEGRATED DIGITAL REFRACTION SYSTEMS

Compact designs and quiet operation for the most effective use of space and an enhanced patient experience.

- Complete multi-network functionality
- Easily integrates with a variety of digital visual charts and EHR systems
- Convenient Dual Cross Cylinder Lens
- Widest field of view to reduce instrument myopia
- Customizable exam sequences
- Available with Refractor or Slit Lamp configuration

AUTO REF/KERATOMETER FEATURING WAVEFRONT TECHNOLOGY

The Huvitz HRK-8000A offers the practitioner the ability to prescribe sophisticated digitally designed spectacle lenses using Wavefront Technology with highly accurate auto-refraction, as well as real-time fluorescein patterns for complicated contact lens fittings.

- Color camera and image capturing function
- Auto 3D Eye Tracking and color touch screen enhance ease of use
- Peripheral Keratometry allows for assessment of the whole cornea

DECODE THE RED EYE

AdenoPlus® is the first CLIA-waived, in-office immunoassay that aids in the rapid differential diagnosis of acute conjunctivitis by confirming or ruling out the presence of adenovirus. Highly accurate, it identifies all serotypes of adenovirus with 90% sensitivity and 96% specificity. AdenoPlus® takes 2 minutes or less to perform, and provides results within 10 minutes.

For more information call 1.855.MY.NICOX (1.855.695.4269) or visit www.myNicox.com/AdenoPlus.
**TOMEY TL-2000C AUTO LENSMETER**  
has a 5.7 inch Color TFT LCD with touch panel and built-in printer.

The TL-2000C Auto Lensmeter can measure Standard & High index, Bifocal, Trifocal, Progressive and Prism Lenses. In addition, it can also give measurement of hard and soft contact lenses.

**TOMEY TMS-4 CORNEAL TOPOGRAPHER:**  
better resolution, accuracy, and coverage than any other product in the world.

The unit comes complete with Klyce corneal statistics software, Keratoconus screening software, contact lens fitting software, Klyce Maeda Multiple Regression Analysis, Smolek-Klyce Classification Neural Network with bit image format. Easily networked.

**TOMEY RT-7000 AUTOREFRACTOR/KERATOMETER/TOPOGRAPHER**  
The 3-in-1 instrument with easy and speedy touch screen alignment and auto shot. Includes built-in computer and on-board printer. Dry eye software inside.

Highly accurate measurement data. Includes diameter measurement of cornea and pupil. The Indices of KAI and KRI that show Corneal Irregular Astigmatism displayed with three levels (A•B•C) at Keratometry. Absolute and Normalized color maps can be viewed for contact lens fitting and Corneal Eccentricity Index of Ortho-K Lens. TSAS (tear stability analysis software) included and fluorescein simulation.

**TOMEY RC-800 AUTOREFRACCTOR/KERATOMETER**  
Features like color touch screen with auto shot function and a high-speed printer make this device easy in handling as well as efficient and fast in operation. Fogging is applied automatically for each measurement for more accurate results. The RC-800 also measures diameter of cornea and pupil.

**TOMEY SP-100 HANDY PACHYMETER**  
Tomey introduces the latest advancement in pachymetry, the SP-100 Hand-held Pachymeter with built-in printer and IOP Calculations.

Measurements are simple and quick using the TOMEY tone-assisted measurement system. Weighs only 19 ounces and comes with a long-lasting rechargeable lithium battery and built-in printer.
**Ophthalmic Product Guide**

**Octopus 600®**
Early diagnosis and standard white-on-white perimetry in one device

The Octopus® 600 extends Haag-Streit’s product range of visual field analyzers combining the Pulsar method for early glaucoma detection and standard white-on-white perimetry for long term follow-up in one compact and stand alone device. The instrument is the first visual field analyzer that performs standard white-on-white perimetry on an integrated flicker-free screen, using TFT and LED technology.

**Reliance FX 920®**
Examination Chair

The FX 920 sets a new standard for design but it retains the core values of all Reliance products — rugged durability. All surfaces of the chair are designed to support a patient’s entire weight. Ergonomic full power tilt is efficient for the practitioner as well as comfortable for the patient. A full complement of controls is available on both sides of chair and a detached dual footswitch adds flexibility.

**Reliance 520® & 8700®**
Examination Chair and Instrument Stand

Reliance’s new 520 chair integrates with the 8700 economy stand. The chair top reclines up to 40° while the patient maintains position. Key features include corded footswitch, dual-rotation locks, pneumatically assisted release mechanism and armrests that rotate up. Backlit switches on the 8700 control chair, stand and indirect lighting.

Customize the 520 with MyColor selections to match any office.

**7900**
Instrument Stand

The Reliance 7900 Instrument Stand is the perfect complement to any Reliance Examination or Procedure chair. Manufactured from the same material as B1 Bombers, the 7900 is tough and scratch resistant. Includes refraactor and slit lamp arms, and switches to control chair’s hydraulic base. Available with or without rechargeable instrument wells.

**TONOSAFE® Tonometry Prisms**
Speed up Exams. Cut Infection Risk.

Tonosafe® disposable prisms eliminate the risk of cross-infection. They easily snap over the tips of Goldmann applanation tonometers, or Perkins tonometers. The prisms are developed for single patient use and only take a moment to position. Calibrated to Goldmann standards, the Tonosafe is the same mass as the Goldmann prism so no conversion of results is necessary.

**LENSTAR® Optical Biometer**
Advanced Biometry - Better Outcomes

In less than 3 minutes, Haag-Streit’s LENSTAR LS 900® captures 5 scans on both eyes with seven biometry measurements, including lens thickness. Each measurement can be validated for quality. Dual zone auto-keratomery equivalent to manual Ks, and auto-population of the data fields in the Holladay IOL Consultant and the Olsen formula, save time and improve outcomes.

*The Holladay IOL Consultant and Olsen formula are not included with LENSTAR LS 900®*
BQ 900® LED
Slit Lamp

Choose the BQ 900 LED for advanced microscopy. The IM 900® imaging module offers a fully integrated imaging solution with unique features and technology. Select accessories such as a teaching scope, inclined eyepieces, a Goldmann tonometer or the stereo variator for the retinal specialist. The convergent view of the BQ 900 LED offers a large binocular field with high resolution and depth of focus.

IM 900®
Imaging Module

The Haag-Streit IM 900 complements the Haag-Streit BQ 900® Slit Lamp with integrated imaging features. Freeze technology captures the image at the exact moment the trigger is pressed. The history trigger can record the moments prior to the image capture and allowing the practitioner to review and select the best image. True aperture allows complete control of the depth of field.

CM 900®
Camera Module

The CM 900 is available on and retrofits to any existing BP 900® LED or BD 900® Slit Lamp. Freeze technology allows you to shoot the perfect image every time. Identify the shot area, and click. Digital video capture automatically begins. Depress the hands-free footswitch to shoot. Review on the monitor, choose from images before and after you clicked, pick the best shot.

BD 900® Slit Lamp
Ideal for Fitting Contacts

The BD 900® is optimized for the optometrists and ophthalmologists specializing in the anterior segment. It is also ideal for fitting contact lenses and for doctors in emergency rooms, who are not ophthalmologists. Optional video fits through a built-in port. Standard magnification adjusts from 10 to 16x times via a lever placed just beneath the microscope.

Octopus 300® Series
Perimeters

The Octopus 300 Series provides a networkable and EMR ready solution (Pro model with EyeSuite) for all your perimetry needs. The 300 series is capable of performing a 2.5 minute full-threshold test with Haag-Streit’s TOP strategy. And with our eye tracking and fixation control, worries about reliability due to fixation losses are over.

Octopus 900®
Versatility PLUS Connectivity!

The Octopus 900 is the most versatile perimeter available. The 900 features static White/White, Blue/Yellow, Red/White, Flicker, Low Vision testing and computer-assisted Goldmann Kinetic. The 900 series also comes with EyeSuite – the industry’s most advanced software for progression analysis – including the first perimetric analysis to combine structure and function.
Kowa nonmyd 7
Retinal Camera
Now Available with
24 Megapixel Resolution

Images viewed by up to 10 work stations on your network
Integrates with most EMR's
VK-2 image management software included

Ophthalmic Product Guide

Now Powered by AAA Batteries, no more expensive custom chargers
New base design increases slit lamp stability
Now brighter & whiter 20,000 Lux LED Source

**NEW BLEPHADEX™ TREATMENT FOR BLEPHARITIS AND DEMODEX**

A brand new, turn-key solution combining an in-office treatment protocol and at-home care for patients with Blepharitis and/or Demodex.

- Patented and unique combination of Tea Tree Oil, Coconut Oil and a Gentle Cleanser
- Blepha Dex™ Applicators are pre-moistened, foam tipped and disposable and at only $2 per patient, provide a tremendous ROI and patient satisfaction
- Blepha Dex™ Eyelid Wipes and Eyelid Foam are comfortable and very cost effective for every other day use
- Made in the USA
- Can be purchased as a complete kit, combining the Applicators and Wipe or Foam and our unique Dry Eye capsules

**NEW MACUSTRIp™ FOR AMD PATIENTS**

A revolutionary and game-changing delivery method for patients with AMD

- NO MORE PILLS TO SWALLOW
- Patented oral thin film (OTF) technology delivers our most popular AMD vitamin in a melt-in-your-mouth strip
- More convenient and easier to take than other vitamins
- Great tasting mint flavor
- Dissolves quickly
- Better patient tolerability and compliance

**IVUE® — VERSATILITY IN SPECTRAL-DOMAIN OCT**

iVue is the most versatile/compact Spectral-Domain OCT in the world for eye-care professionals.

- High-resolution B-scans & Retinal Thickness Mapping aid in identifying/tracking retinal disease
- RNFL Thickness & TSNIT Analysis help identify RNFL loss
- “GCC” Ganglion Cell Complex Scan to help identify early glaucomatous damage
- Angle Measurement & Full Pachymetry Mapping provide the tools to aid in anterior segment assessment
- 3D/En Face Analysis Scan Upgrade with 67 million data points to detect micro pathology earlier

VX 40 FULLY AUTOMATIC LENS ANALYZER

VX 40 is the only lensmeter in the market that combines automation with a high precision in measurement. The unique lens holder system allows a fast insertion of the frame or lens with only one hand! After pushing the measurement button, the whole process works on its own. The VX 40 allows you to spend more time with your patients and less time with analysis.

- 1,350 Measurement Points
- Automatic Lens Type Detection
- Progressive and Free Form Analysis
- Precise, Accurate Results
- Integrated Printer

NEW STEREOPSIS TESTS

NEW Features Include:
- Expanded Graded Circle Test from 400 Sec NOW DOWN TO 20 sec
- New Technology, which Eliminates Monocular Clues
- Answer Key Now Integrated on Test Booklet Cover
- Lea Symbols, the Most Internationally Recognized Symbols for Testing Children
- BOTH Adult & Pediatric Polarized Viewers Included
- Durable Booklet
- NEW Low Price.

Spectra Iris
The little indirect now has even bigger benefits.

- Adjustable aperture for all pupil sizes
- Portable and convenient
- LED long lasting white illumination
- Lightweight and comfortable
- Stylish, comfortable, attractive frame

Keeler Slit Lamp Technology In Your Hands

PSL Classic
- Keeler Optics
- 10x & 16x Mag
- Docking Station & Direct Inline Charging

PSL 1

Keeler Cryomatic
The Standard in Cryo-Surgery
The Keeler CryoMat is the first ophthalmic cryo-system with
cryoSMART technology. The console has a built-in monitoring system
which self-adjusts the optimal operating parameters for any given
probe. The CryoMat offers the surgeon and his staff a system which
performs time after time.

• Disposable & Reusable Probes.
• Automatic Gas Adjustment, any
probe will perform optimally.
• Fast Freeze and Defrost, for ease
of use.
• No manual adjustments, easy
set-up.

KORB MEIBOMIAN GLAND EVALUATOR™

The first standardized metric to evaluate meibomian gland function. The Korb MGE™, by mimicking the pressure of a deliberate blink (0.8 - 1.2 g/mm²), allows the eye care professional to assess meibomian gland secretions and function at the slit lamp biomicroscope. Its use diagnoses inadequate meibomian gland function, the established leading cause of dry eye throughout the world. The Korb MGE™ also tracks the progression of MGD and non-obvious MGD with visit-to-visit consistency and repeatability. For eye care professionals who appreciate the global importance of MGD in maintaining optimal ocular comfort and vision.

LIPIVIEW® OCULAR SURFACE INTERFEROMETER

The first measure of the absolute thickness of the tear film lipid layer and partial blink dynamics. The LipiView® Interferometer combines specularly reflected interferometry from a broad spectrum light source with patented wavefront subtraction analysis. It captures the absolute thickness, motion, and spread of the lipid layer between blinks. The LipiView® Interferometer is a bench-top device with touchscreen centering and display for ease-of-use. For eye care professionals who recognize the importance of identifying and treating lipid deficiency and compromised blinking.

LIPIFLOW® THERMAL PULSATION

The first device shown in a large multi-center, randomized, controlled clinical trial to significantly unblock glands, allowing them to resume natural function. LipiFlow® is an in-office procedure targeting the primary root cause of dry eye using patented Vector Thermal Pulse VTP™ technology. Precisely directed heat raises the temperature of the glands to a therapeutic level while the insulated design protects the cornea and globe. Simultaneously, LipiFlow® applies pressure in a phased peristaltic pattern of 100 unique expressions for 12 minutes to remove obstruction and evacuate stagnant, potentially necrotic, cells from the meibomian glands. For eye care professionals who wish to effectively treat MGD, and by intervening in the resulting cascade, improve ocular comfort and vision.
Tono-Pen AVIA® & Ocu-Film®
The World’s Leading Handheld Tonometer

The Reichert® Tono-Pen® is the industry standard for handheld applanation tonometers, trusted by doctors and technicians for 30 years. The Tono-Pen AVIA® requires no daily calibration, while the ergonomic design makes it ideal for left or right handed use. Advanced signal processing enable fast and accurate IOP measurements with minimal training.

Protect your Tono-Pen® and patients with genuine, FDA approved Reichert® Ocu-Film® + Tip Covers.

**TRUEFIT DIGITAL DISPENSING SYSTEM**

The Truefit Digital Dispensing system gives your practice the edge to deliver superior fitting prescriptions for your patients. Utilizing a sonar-based imaging system, precise measurements of all frame fitting parameters are captured.

- **Reduce Remakes**
- **Increase Upsales** — Anti-Reflective Coating, High-Index Lenses and Tints
- **Sonar Imaging** for precise measurements

**LIGHTSPEED LENSMETER**

The Yeasne LightSpeed Auto Lensmeter is true wavefront for optimal performance. The built-in Hartmann Shack sensor and Green LED light capture provide the highest of accuracy. The Green LED technology eliminates errors due to varying abbe values. The unique parallel processor provides amazingly fast data guaranteed in under 50ms! The LightSpeed is a full service Auto Lensmeter at an affordable price.

- **Compact Lens Table**
- **Hartmann Shack Wavefront Technology**
- **Parallel Processor**
- **Adjustable LCD Touchscreen for ease of use**
- **Auto Lens Detection** — Single, Multifocal, Progressive
- **Large Prism Range**
- **Built In PD, UV and Printer**

**RESEEVIT™ EVOLUTION**

The total Digital Imaging Solution

ReSeeVit™ has been the industry leading imaging software suite since 1992. What began as a single device to “store and forward” anterior segment images has grown into the most complete suite of digital imaging products available on the market. Modules include: Anterior Segment, Retina, Endothelium and WaveFront corneal topography.

**Features:**
- **Robust EMR Integration**
- **IHE (Integrating the Health Enterprise) certified**
- **DICOM Compliant with full IHE Workflow**
- **Linear Measurement Capabilities in millimeters**
- **Video and Still Image Capture**
- **Integrated Interpretation and Report imbedded into exam**
- **Cup to Disc Measurement**

**POTEC PRK-5000L AUTO REF/KER**

The Potec PRK-5000L Auto Refractor/Keratometer provides reliable and accurate measurements. The Auto Fire mode makes capturing data fast and simple. Redesigned with Color LCD screen and compact design for any practice. Efficient, Precise and Affordable!

- **Easy to use, friendly layout**
- **Auto Fire Mode**
- **CLBC measurement**
- **PD Measurement**

**DIGITAL EYE EXAM**

The complete Digital Eye Exam is made possible with our refracting technology. Fewer “which is better 1 or 2” questions reduces your patients’ confusion, and provides a superior exam experience. No more tired shoulders and backache at the end of the day. Enhance your refracting; provide better vision for your patients and Go digital!

- **Reduce stress and strain**
- **Increase patient throughput**
- **Increase revenues**
- **Patient WOW factor!**
ENRICH YOUR PRACTICE

OUR FLAGSHIP TITLE, REVIEW OF OPTOMETRY, IS THE MARKET’S LEADING RESOURCE FOR ALL OF YOUR OPTOMETRY NEEDS.

Review of Optometry is your primary source for groundbreaking clinical information as well as timely news, market trend information and continuing education programs.

Review of Cornea & Contact Lenses serves as a valuable resource for all practitioners and features detailed articles focusing on various fitting methods, solutions and corneal cases. Also available is the Review of Cornea & Contact Lenses “Annual Contact Lenses & Lens Care” Guide, a yearly publication detailing the newest lenses and lens care products.

The Review Group’s Ophthalmic Product Guide brings you the newest and most innovative products on the market. Published every February and July, the guide provides concise information about new literature, drugs and equipment designed to help your practice thrive.

The Review Group also offers valuable continuing education sessions in both print and online formats, allowing a convenient way for you to earn CE credits. In addition, Review also offers an impressive fleet of free e-newsletters, such as Optometric Physician, the Optometric Retina Society quarterly e-newsletter and the Optometric Glaucoma Society E-Journal, so you can keep up to date on breaking news and the latest research online.

On top of these products, the Review Group also spearheads meetings and conferences, bringing together experts in the field and providing a forum for practitioners to earn CE credits and learn from others in the profession.

• Original Ishihara Color Test — color perception test for red-green color deficiencies, 14 plates.

*we also offer Trial Frames & a Large Trial Lenses Box containing 260 lenses, 22 mm aperture.

TOPCON PASCAL® STREAMLINE™ & SYNTHESIS™ PATTERN SCANNING LASERS WITH ENDPOINT MANAGEMENT™

The Topcon PASCAL® Pattern Scanning Laser Systems are renowned for their precision, ease of use and enhanced patient comfort. The PASCAL® method of photocoagulation allows physicians to control the precision, safety and efficiency of the laser procedure, while optimizing patient comfort and convenience. Topcon offers the PASCAL® Streamline™ Laser Photocoagulator and the PASCAL® Synthesis™. Topcon’s premier dual-port pattern scanning retinal laser. All systems are available in both 532nm and 577nm wavelengths. The optional Endpoint Management™ software with Landmark Patterns™ allows for less-damaging subthreshold treatment of a variety of retinal disorders.

TELLER ACUITY CARDS® II

Features Include:
• Clinically validated
• Digitally printed test cards
• No edge artifacts

Proven Features still include:
• Meets AOA guideline for infant vision testing

Testing Formats Available:
• TAC II Full set: 16 cards (from 20/3200 to 20/30)
• TAC II full and half set (from 20/3200 to 20/30)

FORUM Eye Care Data Management

- Allows you to review, compare and analyze diagnostic data from different instruments and earlier examinations
- Centralizes your patient data for easy access whenever and wherever you are
- Integrates from ZEISS and non-ZEISS diagnostic devices
- Connects with most ophthalmic EMR/EHR systems

CIRRUS photo

The versatile multi-modality imaging system

- True color fundus imaging and OCT in one compact system
- Optional Fundus Autofluorescence and FA/ICG angiography
- Interactively analyze registered fundus images and OCT cube scans with the Multimode Navigator
- New Review Software!
